Santa Cruz, CA | 408-216-7735 | sathya.seelam23@gmail.com | [linkedin.com/in/sathyarseelam](https://www.linkedin.com/in/sathyarseelam)

EDUCATION

University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Science (B.S.) in Computer Engineering, GPA: 3.6

Expected Graduation Date: June 2027

- Coursework: Data Structures & Algorithms, OOP, Machine Learning, Operating Systems, Computer Networks, Computer Architecture, Embedded Systems, Database Systems/SQL, Linear Algebra, Probability & Statistics

SKILLS

Active U.S. Top Secret Security Clearance | Full-Scope Polygraph | SCI Eligible

Languages: C#, Python, C/C++, Java, JavaScript/TypeScript

Systems & Cloud: Linux/Unix, Docker, Git/GitHub, Azure DevOps, CI/CD, REST APIs, Networking, Concurrent Programming

Frameworks & Data: .NET, FastAPI, React, Firebase, PostgreSQL, MongoDB, Supabase

AI/ML: PyTorch, scikit-learn, Pandas, NLP, LLM Integration, Claude Code, GitHub Copilot, ChatGPT

WORK EXPERIENCE

Incoming Software Engineering Intern

September 2026

Sandia National Laboratories

Livermore, CA

- Security Information Systems Group, Infrastructure Services
- Role Technologies: .NET, SQL, JavaScript, Angular, Azure Stack

AI Research Intern

June 2026 - August 2026

Federal Bureau of Investigation (FBI)

Quantico, VA

- Developed a metadata-based approach to identify AI-generated imagery using file-structure, embedded metadata, and statistical features across 1,000+ digital media files
- Built Python pipelines to extract and analyze image metadata and forensic indicators across large datasets
- Developed and evaluated a machine-learning classifier using precision, recall, and false-positive rate to quantify detection reliability

Software Engineering Intern

June 2025 – August 2025

Docusign

San Francisco, CA

- Developed C#/.NET microservices, REST APIs, and authentication workflows supporting Integrated Agreement Management premium-trial upgrades across four deployment environments
- Investigated service incidents using Grafana dashboards and Azure DevOps CI/CD logs, debugging backend failures and performing root-cause analysis across microservices and deployments
- Automated eligibility checks and trial-to-paid account transitions, reducing manual intervention and improving workflow reliability

Software Developer & Project Lead

January 2025 – June 2025

SlugAI

Santa Cruz, CA

- Led a six-person team in building an AI text-to-calendar platform using Python, FastAPI, and the OpenAI API, scaling to 200+ users
- Built an LLM-powered event-extraction pipeline with validation and error handling, converting natural-language requests into structured calendar events
- Deployed a FastAPI backend integrating Google Calendar and Outlook APIs for multi-calendar scheduling

PROJECTS

Pennywise

January 2026

Tech Stack: Python, FastAPI, React, Supabase, Gemini API

Santa Cruz, CA

- Built a financial-education platform with a recommendation pipeline that mapped user profiles and quiz responses to personalized learning paths

Parallel HTTP/1.1 Server

December 2025

C, POSIX Threads, TCP Sockets

Santa Cruz, CA

- Built a concurrent HTTP/1.1 server in C with socket networking, pthreads, synchronized file access, and GET/PUT request handling
